

MANDATORY KLIPY BRAND ATTRIBUTION FOR INTEGRATIONS

To ensure a **consistent** and **high-quality** experience across all platforms, apps using the KLIPY API must include clear attribution.

Compliance Note: Meeting these brand attribution requirements is a mandatory criterion for the final approval of your application's production request.

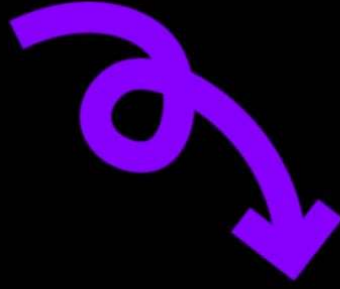

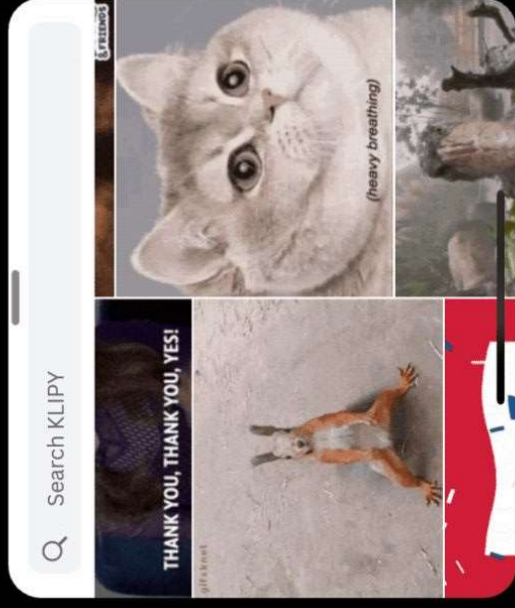

SEARCH BAR PLACEHOLDER (REQUIRED)

To clearly identify the source of the content library provided in your application, set the search bar placeholder to “Search KLIPY”.

Ensure the brand name **KLIPY** is fully capitalized.

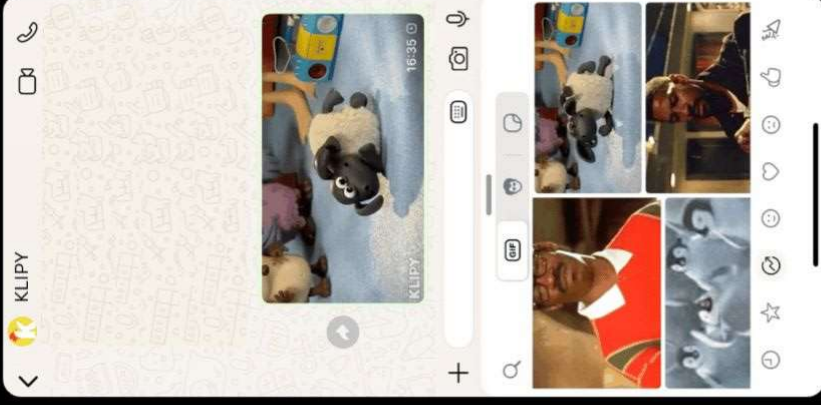

COOL

WATERMARK ON SENT CARD (OPTIONAL)

When a user sends a GIF, Sticker, Clip, or Meme, we strongly recommend displaying a KLIPY watermark on the message card.

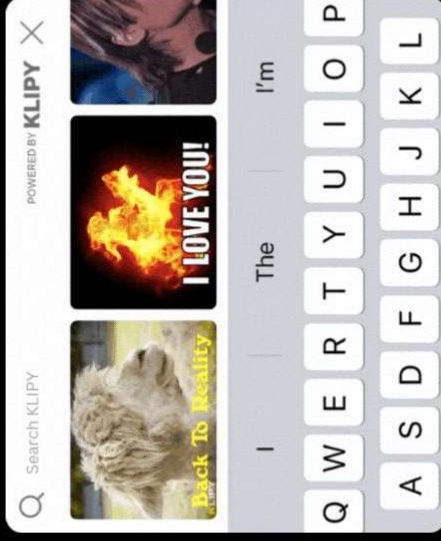

Use the semi-transparent white logo in the bottom-left corner for visibility with minimal distraction.

LOGO IN PICKER / SELECTOR (OPTIONAL)

In any content selector that users browse or preview (for example, a GIF picker), display the “Powered by KLIPY” logo.

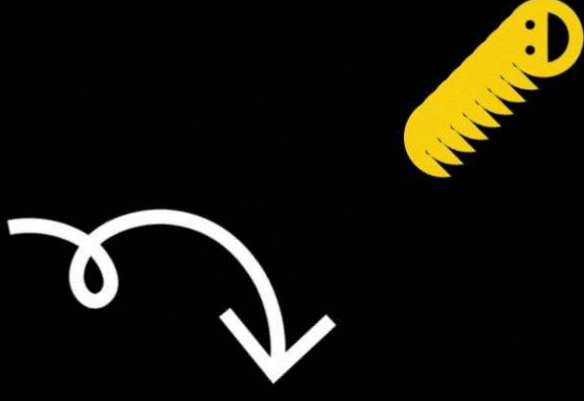

* Place it near the search bar or preview area and keep it visible while the selector is open

We appreciate your attention to these branding details and
look forward to seeing your app go live.

THANK YOU FOR INTEGRATING KLIPY!
